

Learning Management System (LMS)

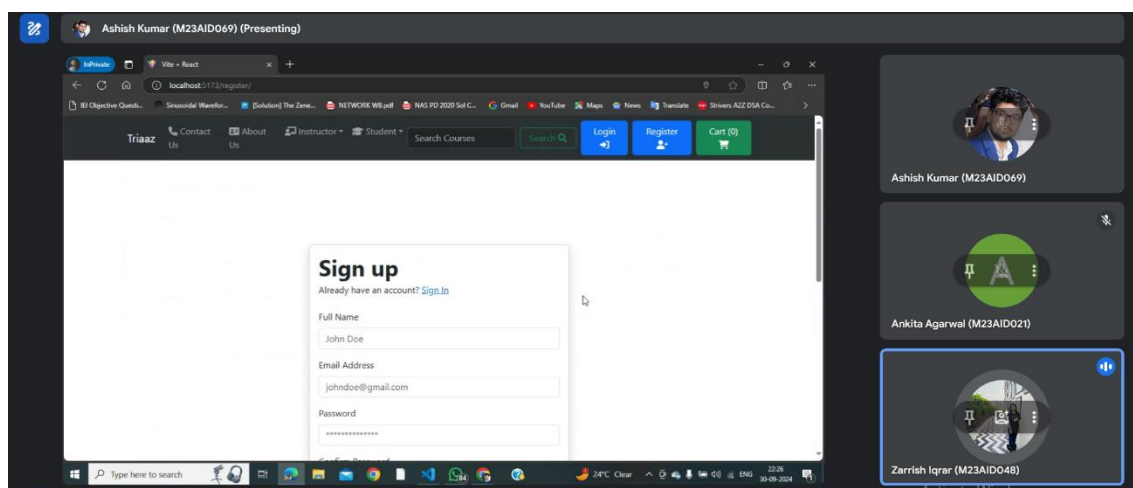

1. System Overview

This documentation describes a comprehensive Learning Management System (LMS) where users can browse, review, and purchase online courses. The system provides a user-friendly interface for course discovery, detailed course information, and a seamless purchasing process.

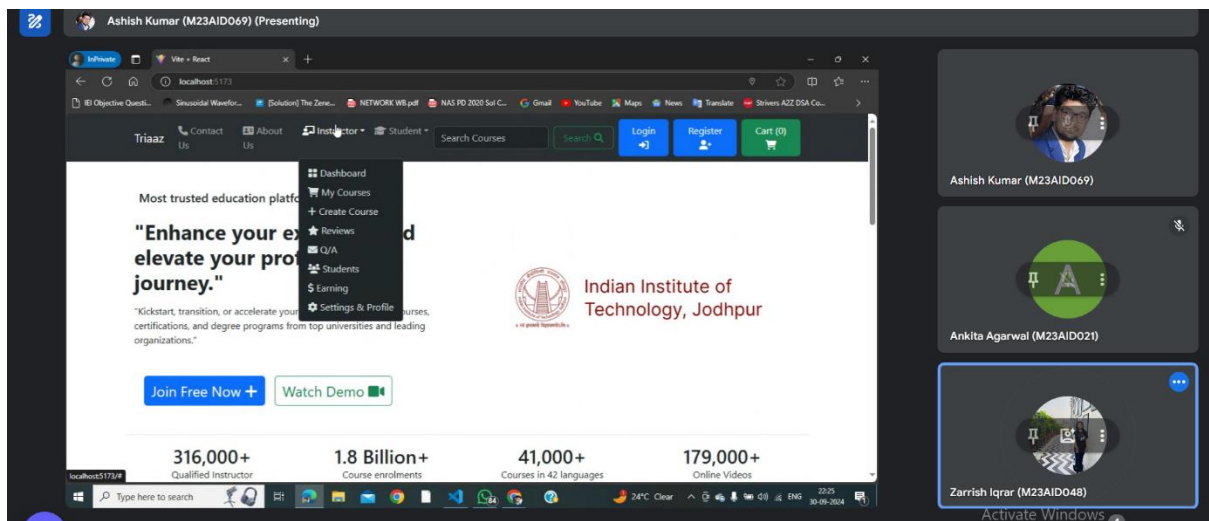

2. Key Features

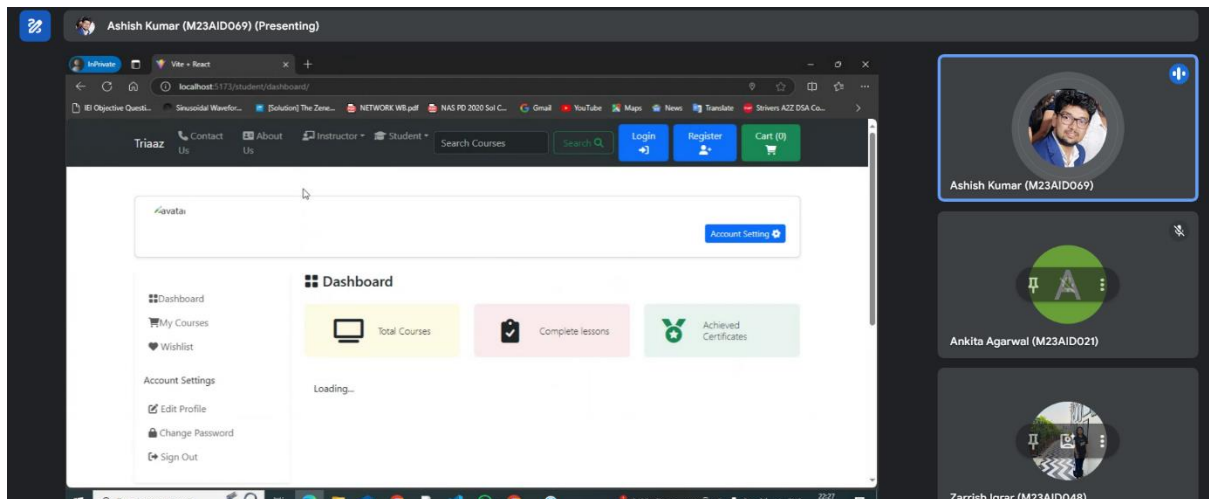

1. User Registration and Authentication

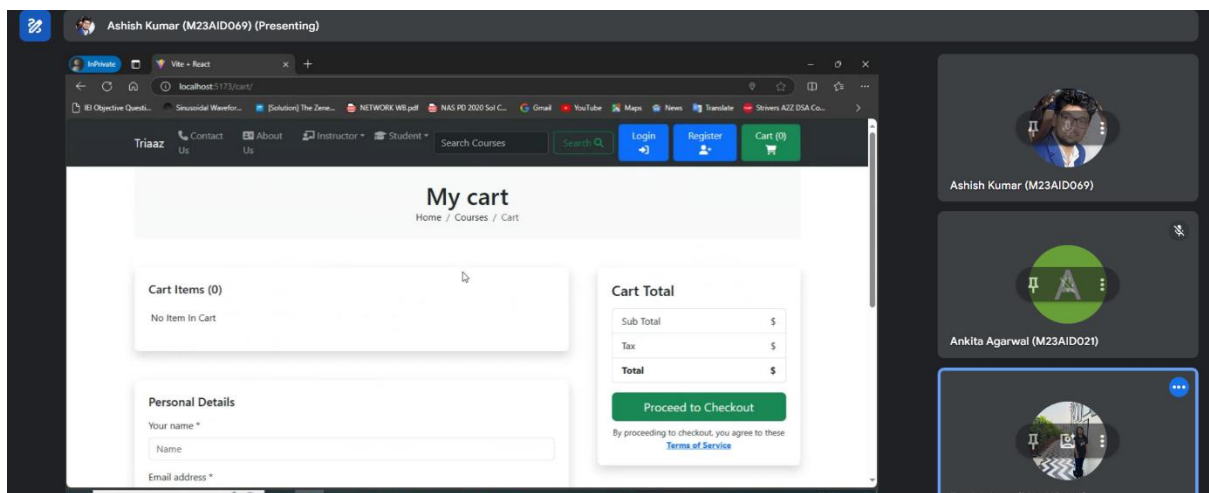

2. Course Catalog

3. Detailed Course Pages

4. Shopping Cart Functionality

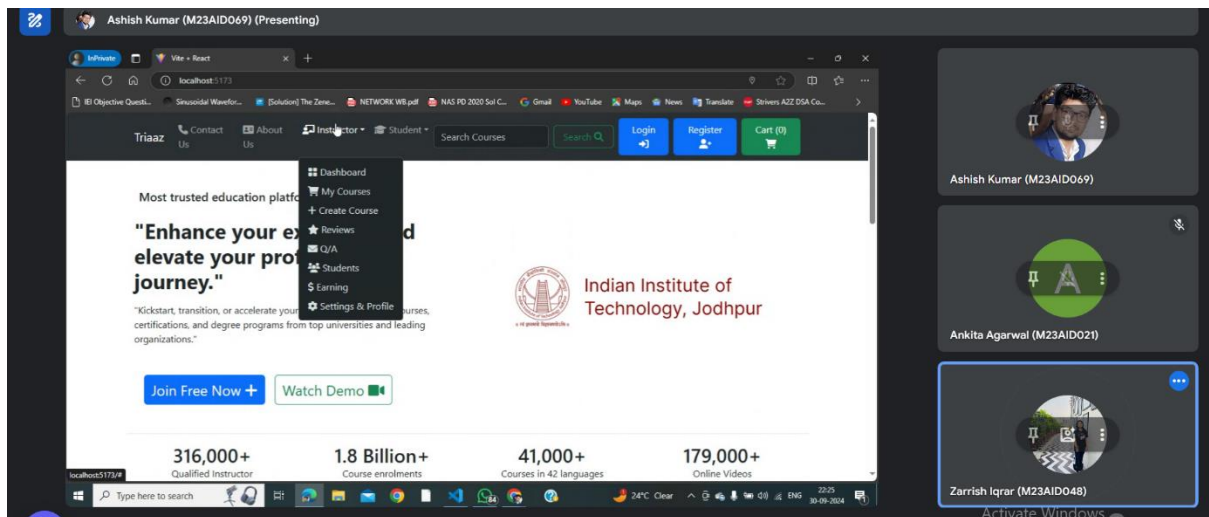

5. Secure Checkout Process
6. Course Access and Management

3. User Flow

3.1 Registration and Login

1. New users register on the website by providing necessary information.
2. Registered users can log in using their credentials.
3. Authentication is required to purchase and access courses

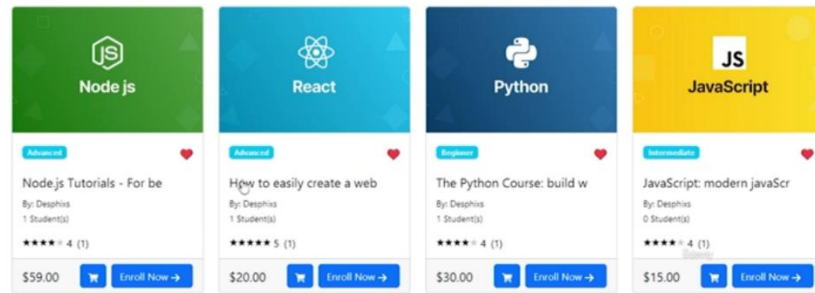

3.2 Course Discovery

1. Users can browse the course catalog.
2. Courses are displayed with basic information (title, brief description, price).
3. Users can search or filter courses based on various criteria (e.g., subject, level, price).

Most Popular Courses

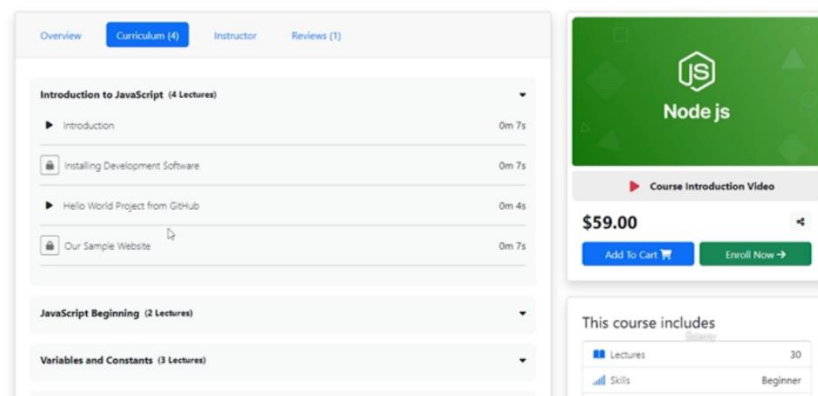

These are the most popular courses among Geeks Courses learners worldwide in year 2022

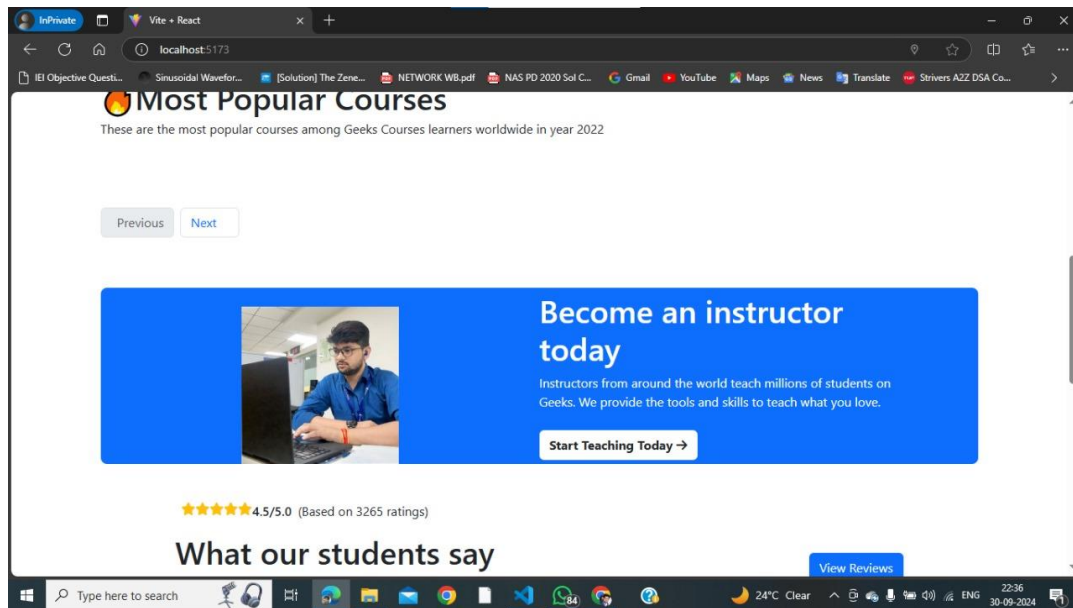

3.3 Course Details

For each course, users can view:

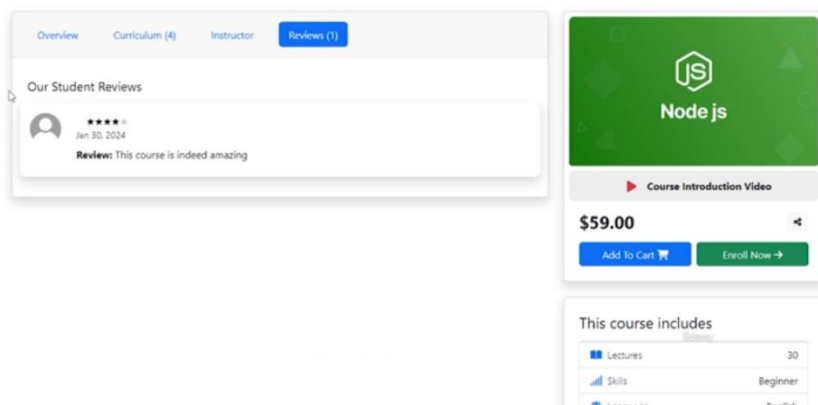

1. Comprehensive course overview

2. Instructor information and credentials.

3. User reviews and ratings.

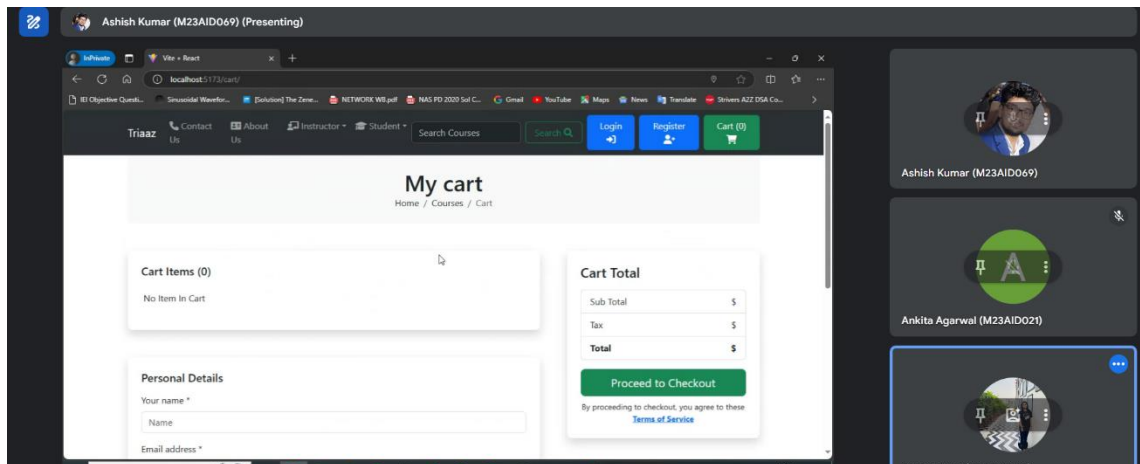

4.Course syllabus or curriculum

5.Pricing information

3.4 Purchase Process

1. Add to Cart:

- Users can add desired courses to their shopping cart.

- The cart icon updates to reflect added items.

2. Cart Management:

- Users can view their cart contents.
- Options to remove items or adjust quantities.

3. Checkout:

- Users proceed to checkout from the cart page.
- They review their order and confirm purchase details.

4. Payment:

- Users complete the payment process using available payment methods.
- The system processes the payment securely.

5. Confirmation:

- Users receive an order confirmation on the website.
- A confirmation email is sent to the user's registered email address.

4.Shopping Cart

- Add/Remove functionality
- Cart summary and total calculation

5. Security Considerations

1. Secure user authentication and authorization
2. Encryption of sensitive data (such as payment information)
3. Protection against common web vulnerabilities (such as SQL injection, XSS)
4. Secure payment gateway integration
5. Digital Rights Management (DRM) for course content

6. Future Enhancements

1. Implement a recommendation system based on user preferences and history
2. Add a wishlist feature for users to save courses for later
3. Introduce bundle deals or discounts for multiple course purchases
4. Implement a gifting system for users to purchase courses for others
5. Add interactive elements such as live sessions and discussion forums
6. Integrate with third-party learning tools and platforms

7. Conclusion

This Learning Management System provides a comprehensive solution for users to discover, review, purchase, and access online courses. By following the user flow outlined in this documentation, developers can implement a user-friendly and efficient e-learning platform.
